19" Rear cable management

The DINTEK rear management panel is ideal for use when installing and terminating DINTEK patch panels.

The management panel allows for cables to be routed away from the patch panel allowing for a sweeping bend and thus minimizing any crosstalk and return loss issues.

Features

- Suitable for modular patch panels and unloaded snap in patch panels
- Rear cable manager allows for cables to be securely tied down
- Required for use in fully structured sites requiring certification
- DINTEK 25Yr Warranty Approved Product when installed and certified as part of a DINTEK Structured Solution.

Compatible Panels

- 1406-00041
- 1406-00040
- 1406-00031
- 1406-00032
