PowerMAX Strain Relief RJ45 Boot (6.5 Ø)

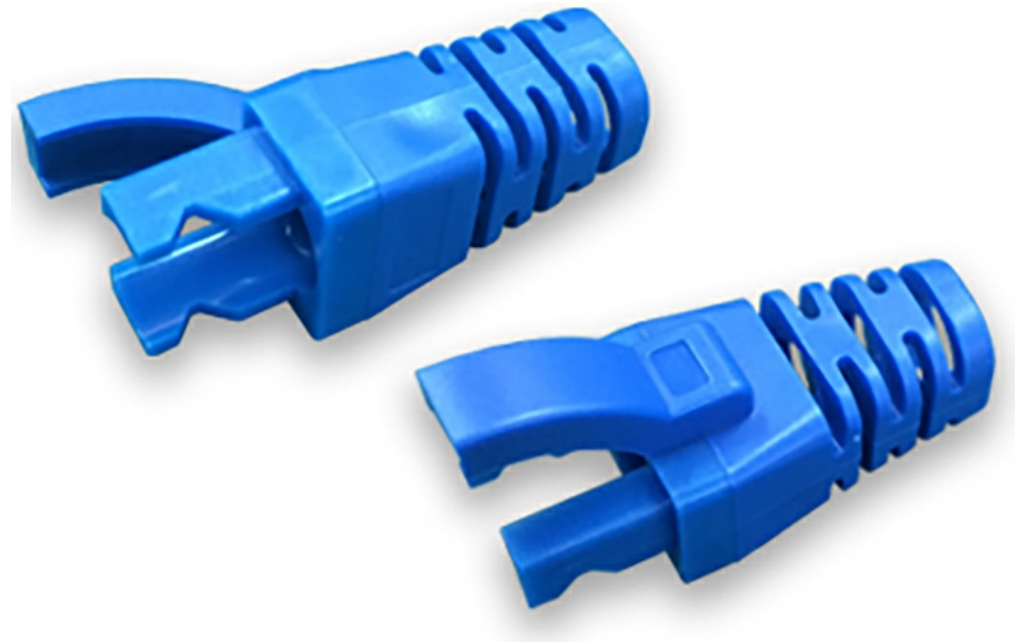

The DINTEK Cat.6 Strain Relief Boot is designed specifically to be crimped with DINTEK Cat.6 RJ45 plugs. Once crimped, this design allows the strain relief boot to relax slightly, helping to prevent the cable pairs from being over compressed. The tab on top of the strain relief is designed to extend over the plug's locking tab, making it snag proof when administering patch cables.
